

1. Market Performance — intraday key indices performance in previous trading session (S&P 500, NASDAQ, DOW, RUSSELL 2000)

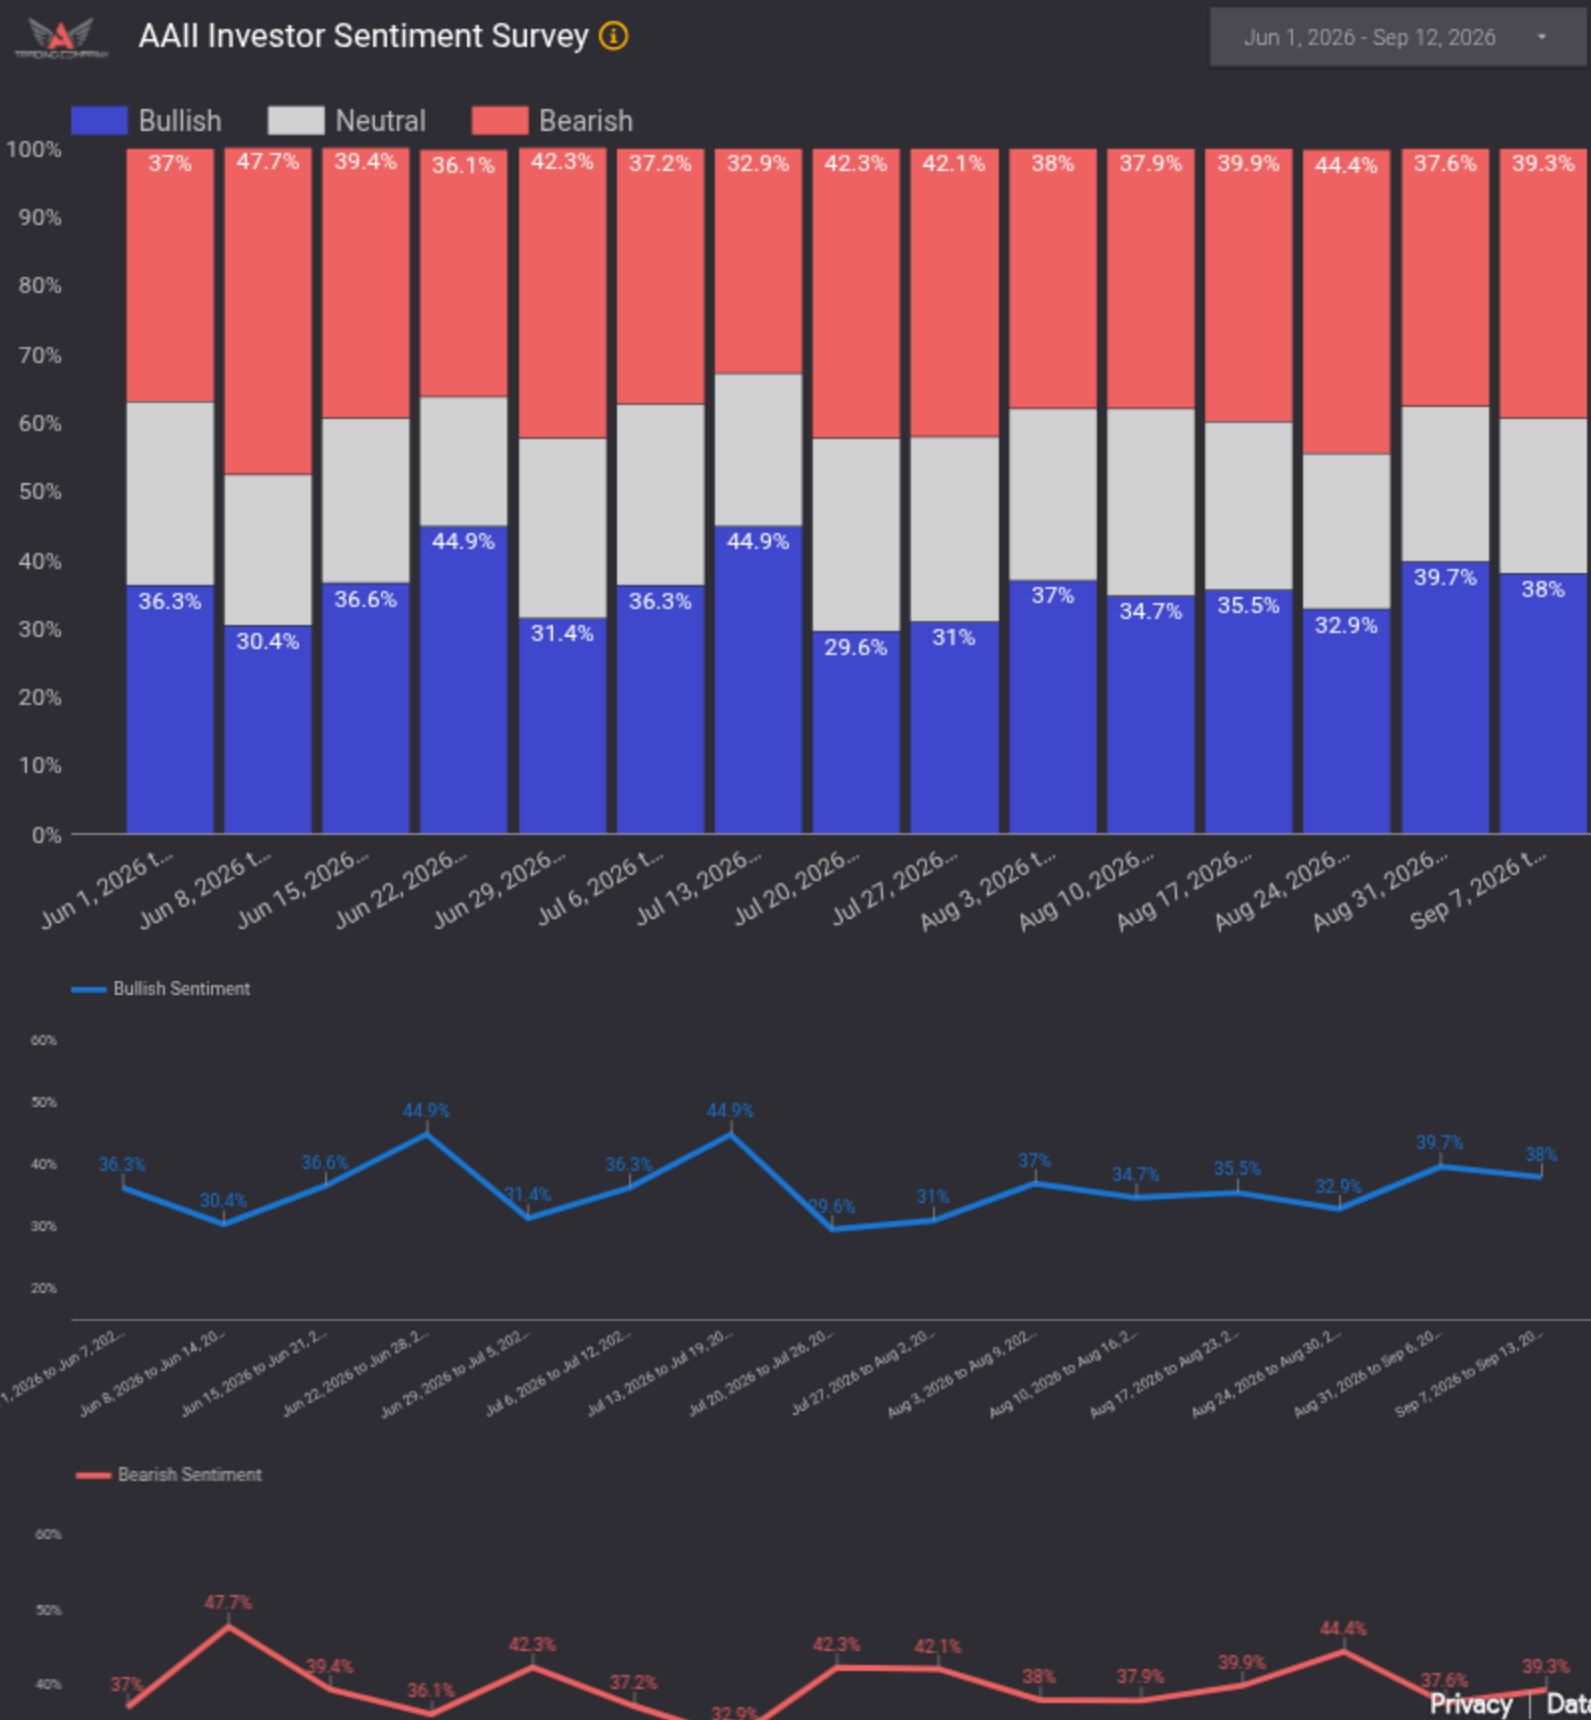

2. Market Sentiment — Fear & Greed Index - latest value shows on the gauge on left part of the image, compare it with previous close/1 week ago/1 month ago/1 year ago values listed on the right part of the image

What emotion is driving the market now.

[Learn more about the Index](#)

2. Market Sentiment — AAI Investor Sentiment Survey (Opinions of individual investors on where the market is heading in the next six months) - compare the latest week bullish (blue) and bearish (red) readings to that of the previous weeks to monitor the sentiment trend

2. Market Sentiment — \$CPC (Total Put Call Ratio) Measured by dividing total traded put option volume by call option volume; high values indicate elevated bearish hedging or panic, while low values signal excessive bullish complacency

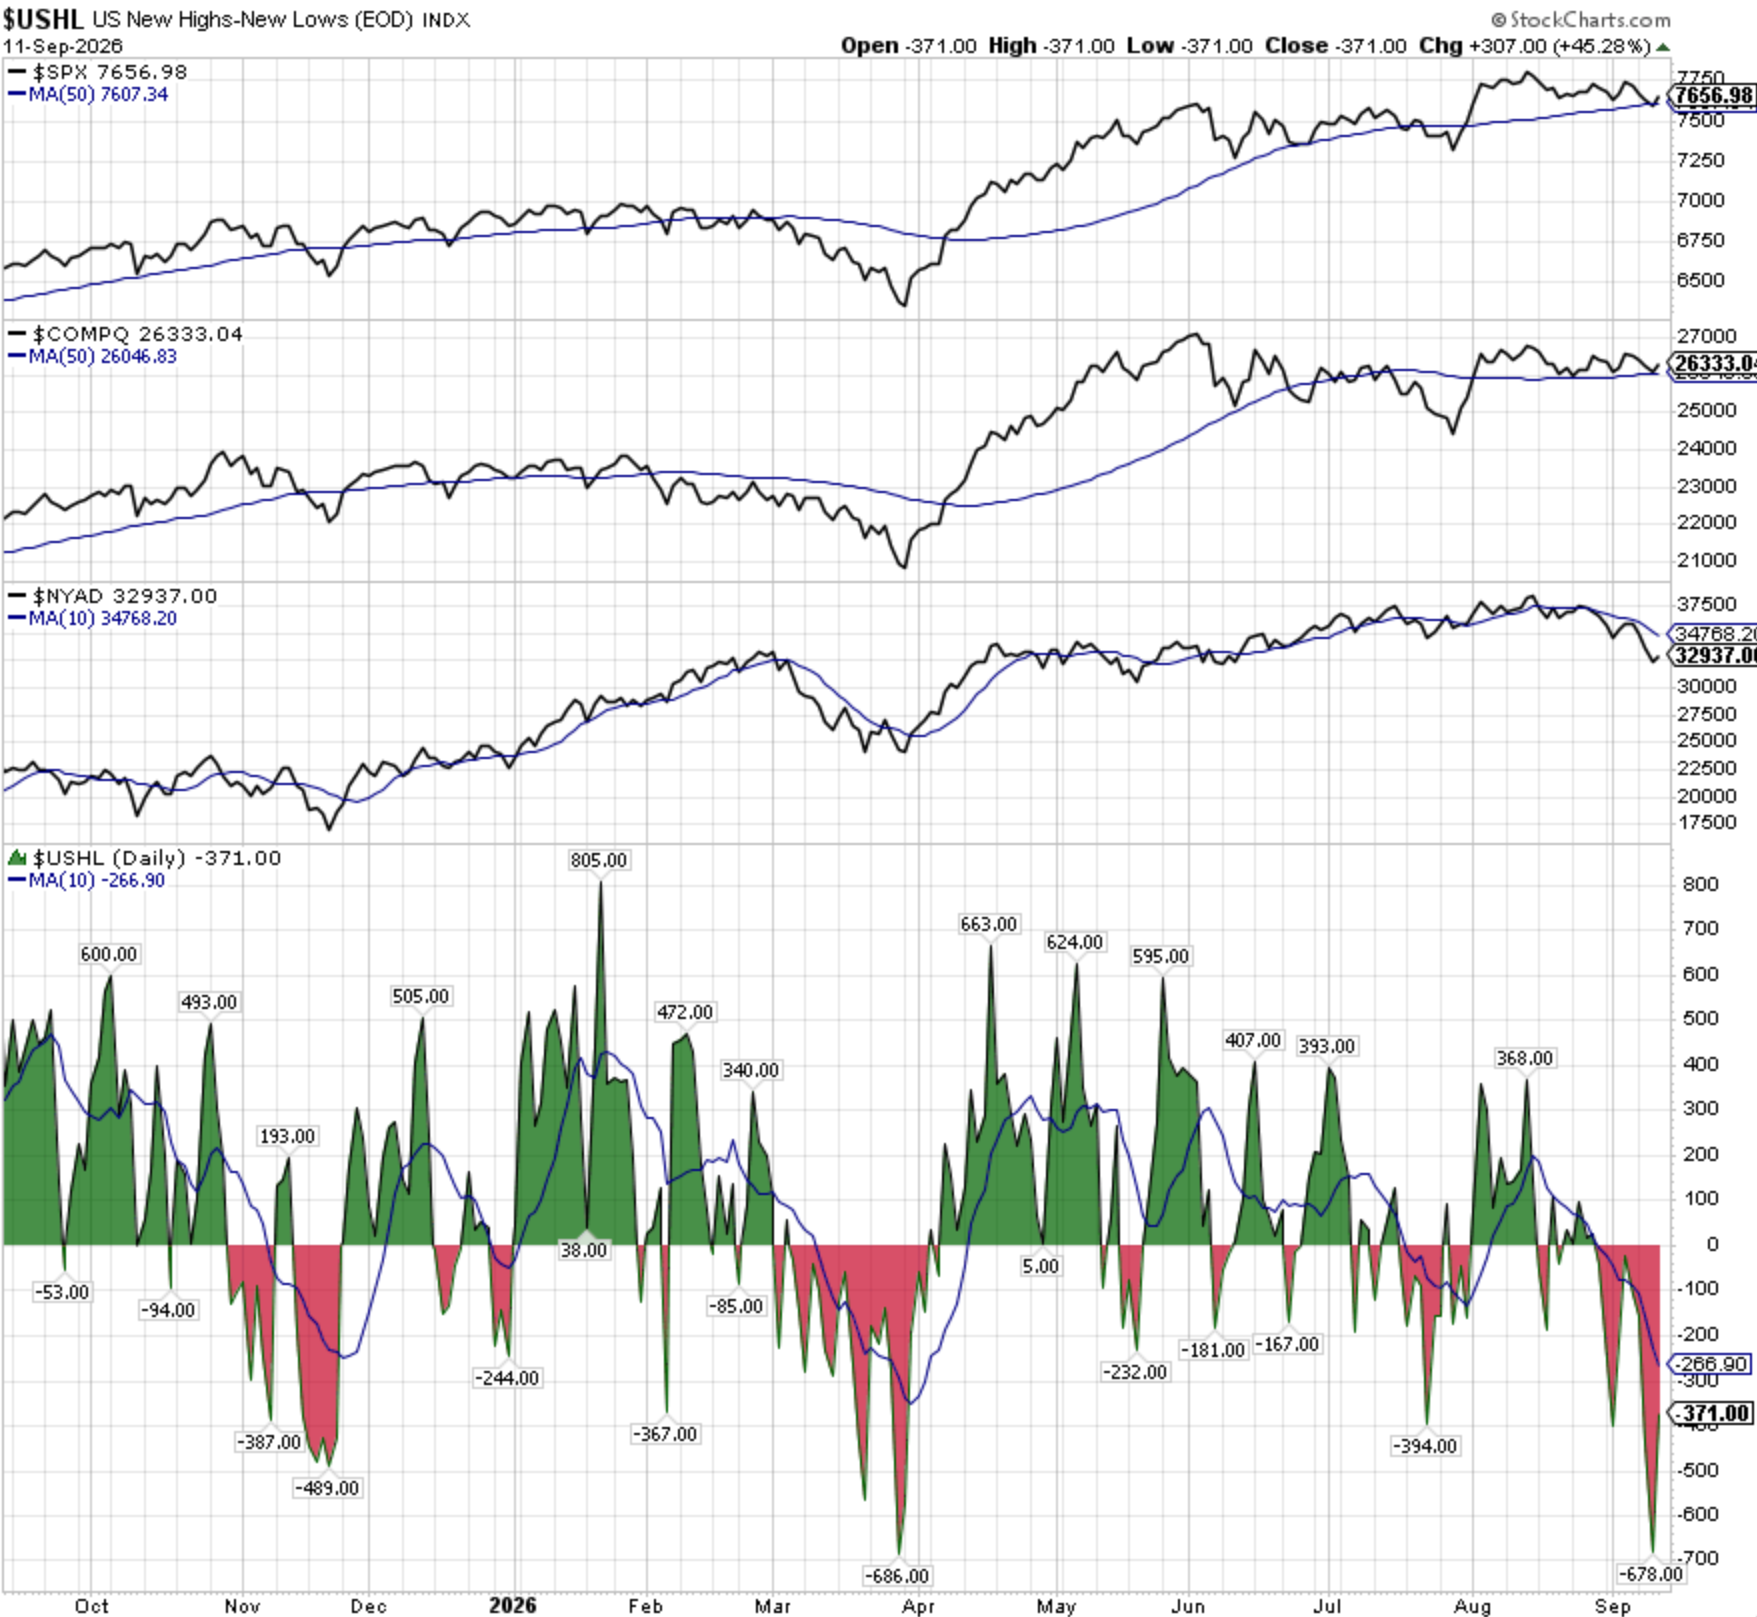

2. Market Sentiment — COT Index tracks the Commercial's net positions in the futures market over the last 26 weeks

5. Economic Indicator — 10-Year Treasury Constant Maturity Minus 30Month Treasury Constant Maturity (Positive means investors expect the economy to grow and demand higher interest rates against inflation; Negative means extreme investor anxiety, investors believe economic trouble is brewing soon and rush to lock in long-term 10-year yields before the Federal Reserve is forced to slash interest rates to combat a recession)

5. Economic Indicator — Normally slopes up from left to right, implies healthy, expanding economy with normal inflation expectations; Flat implies economic transition or uncertainty; Inverted implies heavy fear of an impending recession
